

GEMINI T

幻影者 RGB GLASS-WING MID-TOWER

GEMINI T IS NOT DIFFERENT. IT'S BETTER. THIS NEW CASE FROM COUGAR BREAKS CONVENTIONS WITH AN INTELLIGENT DESIGN THAT COMBINES PERFORMANCE AND INNOVATION IN A GORGEOUS RGB-LIT PACKAGE WITH VERTICAL GPU SUPPORT.

TRELUX RGB LIGHTING
COUGAR's new Trelux technology provides Gemini T with a powerful lighting system of its own: three long RGB-powered lenses cover the front and top of the case. Trelux's dynamic RGB capabilities will amaze everybody!
Controllable directly through a convenient front panel button, Trelux can also work connected to a COUGAR Core Box v2 or compatible motherboards' 5V connection for enhanced compatibility and integration.

GLASS WINGS
Two massive gull-wing tempered glass side panels flank Gemini T. This unique design gives you a clear view of the computer's components and makes tool-less maintenance very convenient. Apart from cooling, the two side fans facing the glass window allow you to set up a fantastic lighting spectacle inside Gemini T!

VERTICAL GPU SUPPORT
Gemini T is both about performance and aesthetics. To bring your system's awesomeness to the limit, Gemini T supports vertical GPU installation. This joins the two supported side fans to produce one of the most incredible side windows a PC case has ever had.

INTELLIGENT COOLING
Up to seven fans and three water cooling radiators match Gemini T's support for the latest components with top-end cooling capabilities.
Two big frontal vents with detachable filters guarantee a clear air intake, while two side vents on both sides of the top cover create an excellent way for the exhaust to leave the case without dust getting in.

Removing the side panels

Installing an internal 2.5" HDD/SSD

■ **2.5" Storage Device Installation:**
Three brackets for installing 2.5" SSD are included. Please choose three of the five numbered locations shown in the pictures above to install them. Only three SSDs may be installed simultaneously. SSD brackets are not sold separately.

Installing an internal 3.5" HDD

Installing water cooling radiators & cooling fans

Installing PCI-E cards

■ Up to three 425mm graphics cards

■ Support for one vertical graphics card up to 400mm-long

Removing the dust filters

Gemini T's Trelux lighting system offers you several ways to control it:

■ Please connect the power cable of the I/O panel to an appropriate SATA connector from the PSU in order to use the case's lighting functionality.

■ **First Mode: Lighting Button**
You can use the front panel's dedicated button to switch between the fourteen beautiful lighting effects we have preset for you.

■ **Second Mode: Motherboard Synchronization**
Second, you can use the included adaptor (see picture below) to connect the Trelux system to a compatible motherboard's 3-pin 5V Addressable RGB header and enjoy system-wide RGB synchronization.

■ **Third Mode: Core Box v2**
You can also benefit from integrated control of Gemini T's Trelux lighting system, up to eight fans and two RGB LED Strips by connecting the case with the included adaptor to a COUGAR Core Box v2 (sold separately). This control box will allow you to enjoy 100 different synchronized lighting effects in all the above devices and manage them through the remote controller. As an alternative, you can also connect the Core Box v2 to a compatible motherboard's 3-pin 5V Addressable RGB header for system-wide synchronization.

Note: When using the Trelux lighting in the second or third modes, the lighting control button will have no functionality assigned to it.

Lighting Mode Indicator

■ When using the first lighting mode (i.e., control through the I/O panel's button), the lighting button to the left of the I/O panel will be lit. When using the second or third mode, the LED of the lighting control button will be off.
